

All new updates and enhancements on VO 4.0.

Version 4.0.2000

2016-02-04

1. *New Map View*
2. *GIS Parameterization Tools*

Version 4.0.2001

2016-02-29

Fixed the bug where the paste operation in Parameter Tables wrongly start from first column.

Version 4.0.2004

2016-07-06

Fixed the bug related to the storm duration calculation in project database. The calculated duration is always a time step longer than the right one.

Version 4.0.2005

2016-07-26

Fixed two bugs:

1. *Incorrectly import Mass Design Storm from VO 2.4 project file*
2. *Duplicated Run group ID when importing from older version.*

Version 4.0.2006

2016-10-04

Allows to detect the Proxy Server automatically when reading the Internet time.

Version 4.0.2007

2016-10-20

Reduced the threshold value for IDF ABC fitting (0.9999 to 0,999) to allow properly fitting ABC.

Version 4.0.2008

2016-11-07

Fixed the bug where the project can't be loaded properly by double-clicking the project file.

Version 4.0.2009

2016-11-17

*Allows negative IA for NasHyd to calculate IA using SCS method where $IA = 0.2 * S$.*

Version 4.0.2010

2016-11-29

Fixed the bug where the storm duration in the storm library and rain group is not consistent which would cause adding a design storm to an existing rain group fail.

Version 4.0.2011

2017-03-06

Added function to export VO4 project to VO3 project [Export -> Export Project (VO3)].
